Group 16G25 Lab Project
Internal Meeting Notes

Attendance: Scott Hazelhurst, Paul Cresswell, James Allingham
Minutes noted by: Paul Cresswell

29 September 2016

This meeting focussed on feedback from the proposals and various administrative tasks

1   Proposal Feedback

As a whole, Prof. Hazelhurst was happy with the proposals. He said that the were two main areas that could have been focussed on better:

- Needed clarity on the necessity of using neural networks for this type of application

- Needed to identify the complexities inherent to the project, which might lead to a scaling down of its ambitiousness

2   Administrative

- Meetings with the all the software groups were set up for Mondays at 12:15pm in the Chamber of Mines

- Meetings for the group personally were set up for 9:00am on Tuesdays at SBIMB if necessary

- The staff inspection has been moved from 12 October to 11 October between 2:00pm and 3:00pm

3   Journal Club

A 30 minute talk at the Journal Club has been organised for the two students to present on 30 September, which starts at 9:00am
